\$

D. Indicate the billing frequency of the water system: Monthly Quarterly Semi-annually Other

E. Complete the projection of revenues and expenditures of the water system over the next 4 years. This projection outline appears on the next 2 pages.

Notes Regarding Loan Payment Estimate:

- 1) For the "Projected SDWLP Loan Payment" estimate, contact DNR to obtain the current loan program interest rates. You may want to round this interest rate up in order to allow some cushion in case the program interest rates change prior to the loan closing.
- 2) The loan term may not exceed 20 years from the date of the loan closing and must end on a May 1st principal payment date. Accordingly, if the loan is for 20 years but there is 1+ years of construction before the principal payments start, then the loan will be amortized over 19 years (i.e., 19 principal payments) rather than 20 years. In calculating your estimated loan payment, you will need to consider the length of the project construction period in order to determine the number of years remaining to amortize the loan since this affects the size of the loan payment.
